mcCheckList®

An overview

CHECKLIST TEMPLATES

- ▶ Creation of any type of checklist, such as for **inspection, maintenance and service reports** or testing and acceptance protocols

- ▶ Creation and management of templates **right in SAP**

- ▶ **Flexible functions for creating a structure,** such as headers, sections and footers

- ▶ Checklist's **date of validity** controlled in SAP (start/end date of validity)

- ▶ Ability to assign checklists to **orders, functional locations or equipment**

CREATING FORMS

- ▶ **Text,** text blocks and **numeric values**

- ▶ **Date** and **time fields**

- ▶ Checkboxes, radio buttons and **selection lists**

- ▶ Barcode fields and **location (GPS position)**

- ▶ **Photos** and sketches

- ▶ Electronic **signature**

- ▶ E-mail

RECORDING A CHECKLIST

- ▶ **Checking** a numeric field **for plausibility**

- ▶ Checking entries for **completeness**

- ▶ **Context-dependent** display of fields

- ▶ **Mandatory** and optional field entries

- ▶ Ability to **populate fields** with existing master data

DYNAMIC CHECKLISTS

- ▶ Changes to the templates in SAP are **updated on mobile devices automatically**

- ▶ **No mobile device programming** needed

DISTRIBUTION OF CHECKLISTS

- ▶ **Automatic generation** and distribution of PDF reports by e-mail

- ▶ Support for **e-mail distribution lists**

ANALYSIS AND INTERFACES

- ▶ **Saving and evaluating** checklists in SAP

- ▶ **Long-term archiving** of created reports in SAP

- ▶ Option to use mcCheckList® **as a standalone application**

- ▶ Or as an add-on to the mCompanion® product from our MPS product suite using **a suitable interface**
